

## **Additional File 4.**

### **Haploid rRNA gene and insertion number.**

**[a]** Haploid 18S and 28S gene number in each *Daphnia* isolate. Vertical lines are standard errors. Differences that are NOT significant after sequential Bonferroni correction are indicated by “ns”.

**[b]** Haploid number of rPokey and 28S genes with and without insertions in each *Daphnia* isolate.

u28S are uninserted 28S genes

rPokey are inserted in 28S genes.

rInserts are insertions other than rPokey in 28S genes.

rInserts were calculated as [total 28S – uninserted 28S – rPokey].

**b**
